

## BROCAS CERRADAS DE MARCA SUPERIOR

### Características:

Los bits de extremo abierto o cerrado se pueden diseñar para cumplir con las necesidades específicas de su aplicación.

Brocas de diamante de larga duración y alta calidad fabricadas según los estándares de la Asociación de Aserrado y Perforación (CSDA).

Nueva forma de segmento agresivo

Forma trapezoidal = Perforación más rápida

- Concreto reforzado
- Hormigón
- Hormigón pretensado
- Materiales superduros y cerámicos
- Diamantes seleccionados de alta calidad, ubicados en una matriz metálica resistente y unidos a tubos de acero pesado
- Diámetros de broca estándar de 1/2 "a 72" (1.27 cm a 183 cm)
- Muestra de núcleo de longitud de bits estándar de 13 "y longitudes personalizadas diseñadas para aplicaciones especiales de perforación
- Perforación rentable con la máxima velocidad de penetración

**SKU:** N / A | **Categorías:** [Broca](#) |
